

Gangaji Karthikeyan

B.Tech 3rd Year | CMR Technical Campus

(+91) 98661 70506 | karthikgangaji@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#) | Hyderabad, India

EDUCATION

CMR Technical Campus

B.Tech in Computer Science and Information Technology

CGPA: 9.12

Hyderabad, India | 2023 – 2027

Sri Chaitanya College

Intermediate (MPC)

Percentage: 92%

Hyderabad, India | 2021 – 2023

SKILLS & TECHNOLOGIES

Languages : Python, Java, SQL

Frontend : React.js, HTML, CSS3

Backend : Django, Flask, FastAPI

Database : MySQL, PostgreSQL, SQLite

DevOps : Docker, Kubernetes, Git, GitHub, GitHub Actions, AWS, Linux, CI/CD

Cloud : AWS Cloud Quest: Cloud Practitioner – Verify Badge

Tools : Docker Desktop, GitHub, Swagger UI, Vercel, FFmpeg, MS Excel

Concepts : Microservices, Containerization, CI/CD, REST APIs, Linux, Networking, Docker Compose, OOP, Data Structures, Algorithms

EXPERIENCE

Full Stack Developer Intern

PSS Automate Private Limited

May 2026 – Present

On-Site | Hyderabad, India

- Contributed to enterprise-grade React and FastAPI applications built on a microservices and multi-tenant architecture
- Worked extensively with Dockerized services to build, run, debug, and manage multiple microservices in the local development environment
- Validated REST APIs using Swagger UI, tested service integrations, and collaborated in troubleshooting application deployment and API communication issues

Data Entry & Data Cleaning Intern

Suvidha Foundation

1 Month

Remote | Hyderabad, India

- Maintained structured datasets while ensuring data accuracy and consistency across reporting systems
- Collaborated using Git-based workflows and organized project documentation to support efficient team operations

PROJECTS

Get to Know About Hyderabad – [Live](#) → [Click to Explore](#)

2025

- Full-stack platform for exploring Hyderabad localities, backed by structured government land-rate datasets
- Built automated data collection pipelines using headless Chromium to scrape and structure Telangana government land-rate data
- Designed the backend data model (Django + PostgreSQL) to store and serve cleaned locality-level datasets via REST APIs
- Integrated Google Maps API to visualize dataset outputs geographically for end users

VideoMind — Video Knowledge Extraction & Semantic Search – [Live](#) → [Click to Explore](#)

2025

- Data pipeline that converts unstructured video content into searchable, structured semantic data
- Built a processing pipeline using OpenAI Whisper for transcription and vector embeddings for semantic search over extracted text data
- Developed REST API services (Django) to structure, store, and query the extracted knowledge base

Taskifier — Autonomous Workflow Orchestrator

2025

- Agentic AI platform designed using containerized microservices and automated workflow execution
- Developed a React and Django REST application with modular services supporting autonomous task planning and workload distribution
- Designed backend services following microservice principles, enabling scalable deployment and simplified service management

Placement Management Portal (DevOps)

2025

- Centralized campus recruitment platform with automated build, deployment, and infrastructure workflows
- Developed a full-stack application supporting student registration, company onboarding, application tracking, interview scheduling, and role-based authentication
- Implemented CI/CD pipelines using GitHub Actions with Docker-based containerization and Kubernetes orchestration for automated deployments
- Built scalable deployment workflows enabling continuous integration, automated testing, container management, and streamlined application delivery

CO-CURRICULAR ACTIVITIES

- Solved **450+** DSA problems across LeetCode and CodeChef
- NSS Volunteer** — Community service and campus social initiatives at CMR Technical Campus
- Lexis Club Member** — Communication, debate, and collaborative activities
