

Gangaji Karthikeyan

B.Tech 3rd Year | CMR Technical Campus

☎ (+91) 98661 70506 | ✉ karthikgangaji@gmail.com | 🌐 Portfolio | 🐙 GitHub | 💼 LinkedIn | 📍 Hyderabad, India

Education

CMR Technical Campus

B.Tech in Computer Science and Information Technology, Hyderabad

CGPA: **9.25**

2023 – 2027

Sri Chaitanya College

Intermediate (MPC), Hyderabad

Percentage: **92%**

2021 – 2023

Experience

Data Entry & Data Cleaning Intern

1 Month

Suvidha Foundation

Hyderabad, India

- Performed structured data entry and quality assurance on large datasets ensuring accuracy for reporting pipelines.
- Organized and maintained records in spreadsheets and databases to support smooth data analysis workflows.

Projects

Get to Know About Hyderabad | [Live](#) — Click to explore the website

2024

Real estate intelligence platform for exploring Hyderabad localities with ML-powered property price predictions.

- Full-stack platform — **React** frontend, **Django** backend, **Google Maps API** for locality exploration with **ML**-powered property price predictions.
- Built a headless **Chromium** scraper to collect IGRS Telangana government land rates with real-time **CSV** auto-save as model input features.

Video Knowledge Extraction & Semantic Search | [Live](#) — Click to explore the website

2024

Converts long videos into searchable knowledge bases using speech-to-text, embeddings, and RAG-powered semantic search.

- **Full-stack platform** — **React** frontend with **Django** + **SQLite** backend; uses **OpenAI Whisper** for transcription and **OpenAI Embeddings** for vector search.
- Pipeline: speech-to-text → vector **embeddings** → **RAG**-based semantic search with **local LLMs** to answer user queries.

Taskifier — Autonomous Workflow Orchestrator

2025

Agentic AI platform that autonomously decomposes project briefs into tasks and assigns the right team members using Claude.

- **Agentic AI platform** that decomposes project briefs into task plans using **Claude** with a **RAG** pipeline for skill-aware, workload-balanced team assignments.
- Full-stack **React** + **Django REST** system with autonomous replanning triggered on task completion events.

20+ Python Mini Projects

2023 – 2024

- Utility tools including PDF merger, QR code generator, image resizer — all maintained with **GitHub** version control.

Skills & Technologies

Languages: Python, JavaScript, Java, SQL

Frontend: React.js, AngularJS, HTML5, CSS3, Bootstrap

Backend: Django, Flask, Node.js, Streamlit, REST APIs, APScheduler

Database: MySQL, SQLite, SQL, NoSQL

AI / ML: Scikit-learn, Machine Learning, Deep Learning, Feature Learning, Supervised Learning, Unsupervised Learning, Model Fine-Tuning, RAG, OpenAI Embeddings, Whisper, Semantic Search, Local LLMs, Prompt Engineering, LLM Orchestration, Agentic AI, NumPy, Pandas, Matplotlib, Seaborn, SciPy

Tools: GitHub, Vercel, Chromium, FFmpeg, Power BI, Tableau, MS Excel, CSV, Pickle, Joblib, Google Maps API

Concepts: Data Structures, Algorithms, OOP, Web Scraping, Statistical Analysis, Agentic Workflows, Vector Search

Co-Curricular Activities

- Solved **200+ DSA problems** across LeetCode and CodeChef.
- **NSS Volunteer** — Community service and campus social initiatives at CMR Technical Campus.
- **Lexis Club Member** — Communication, debate, and collaborative activities.
